

**Position: Software Engineer - Application Development**

**Location: Winter Park, FL**

**About Us:**

We're looking for talented Software Engineers of any experience level to join the team that builds and supports Highwinds' award-winning Rich Internet Application, StrikeTracker®. StrikeTracker is the real-time command and control UI and REST interface for our global, high-performance Content Delivery Network (CDN).

Software Engineers at Highwinds get a spacious, sunlit workspace surrounded by glass and wood, a high-end chair, a large monitor, and a MacBook Pro with plenty of RAM. Our new office space was designed so each team can work together, whether it's to sketch out ideas on a white board or enjoy an espresso together during a quick morning huddle.

The StrikeTracker team is small and focused on delivering high quality, robust software as rapidly as possible. We are a self-organizing and cross-functional Agile team that values team players with a positive attitude and a passion for quality software, clear and concise communication, simple and robust solutions, practical thinking, rapid development, and a focus on our customer's needs.

**Required Skills & Experience:**

- Professional experience with Java, Hibernate, and JUnit. Spring is a plus.
- Professional experience with distributed application development using REST or other remoting technologies.
- Demonstrable understanding of object-oriented technology and industry design patterns.
- Experience with an RDBMS platform such as MySQL, Oracle, MS SQL Server, etc.
- Strong written and verbal communication skills, favoring concise over verbose.

**Education:**

- Bachelor's degree in a software-related field (Comp. Sci. or equivalent strongly desired) or comparable industry experience.

***This job description is not intended to be all inclusive. Applicants must be legally permitted to work in the U.S. in order to have their application considered.***

***Highwinds is an Equal Opportunity Employer.***

If you are interested in this position with Highwinds, please submit your cover letter and résumé to [careers@highwinds.com](mailto:careers@highwinds.com). In the subject line of your email, please include the title of the position.

If your experience and qualifications match our current needs, you will be contacted by a member of our human resources team. We look forward to hearing from you!
